

## Environmental Policy

At O'Shea's Ceol na hAbhann, it is our policy to achieve, at minimum, environmental compliance with all relevant environmental legislation. We are committed to continual improvement of our environmental performance by funding new initiatives in the home and both assessing and improving our behavioural habits in line with our objectives and targets which are set annually.

It is our policy to:

- Create environmental awareness within our home and to all of our visitors.
- Promote environmental responsibilities with all of our staff.
- Ensure that our Bed & Breakfast operational activities do not impact negatively on the environment.
- Reduce waste production, reuse packaging and products, and recycle as much waste as possible.
- Minimise the use of toxic or hazardous substances by choosing alternative environmentally friendly cleaning products.
- Use water and energy efficiently by creating awareness of water and energy usage throughout the house.
- Monitor environmental performance annually by assessing the costs associated with energy usage and waste disposal and also by reviewing feedback from our customers.
